

*Depending on how your CX system is set up, this command may not be available. Please consult your system administrator for additional information.

Welcome!

Your organization's new CX messaging system is designed to provide you with the same convenient access to your voice, fax, and email messages whether you are at your desk or calling in over the telephone. When you call in, the Octel® Serenade® emulation saves you the effort of relearning most of the keystroke commands you use to send, retrieve, and manage messages.

Before You Start

To set up your CX mailbox, your system administrator will give you the following information.

CX internal number: _____

CX external number: _____

Your subscriber mailbox number: _____

Your system administrator may also give you a default security code to use when you log on to CX for the first time.

Gaining Access to Your Mailbox

Follow these simple steps to start using CX.

1. Call the CX internal or external number.
2. If necessary, press the key for triggering a subscriber log on (default = #).
3. If prompted, enter your subscriber mailbox number.
4. Enter your security code (or the default code, if your administrator has given you one).

Performing Common Tasks

If you are looking for a quick hint on how to perform a specific task, here is the list of the shortcut commands.

† Depending on how your CX system is set up, this command may not be available. Please consult your system administrator for additional information.
